

Request for an Adjustment of Sewer Charges Due to pool installation/repair

The City of St Pete Beach contracts with Pinellas County Utilities (PCU) for billing of sewer charges. Sewer charges are calculated based on potable water consumption. If you have a large potable water consumption exception due to having a pool installed, remodeled or repaired; you may request an adjustment to the sewer charges for one billing period subject to the following restrictions.

- Adjustment requests must be made within 60 days of the bill showing the exceptional usage.
- Any credits granted will show in subsequent billing periods. You must pay your bill in full and on time. The City cannot help with late fees, fines, interest or penalties.
- Customer must have had PCU water service for 3 billing periods before requesting any adjustments.
- Customer must provide legible copies the following items:
 - Your Pinellas County Utilities bill that shows the exceptional water usage.
 - Your Pinellas County Utilities bill from the previous period showing normal usage.
 - Paid invoice from the pool company that did the work.
 - City of St Pete Beach permit number and date (if new pool installed)

To request an adjustment for sewer charges, fill out the information below and email it to lclark@stpetebeach.org
